DEAL #42

Jane Dane

2024 Honda Accord

DEAL

Touring White

\$37,100 \$0/mo · mo @ 0%

Type	Cash
Down	\$40,860
Products	Extended Warranty (100k) — \$2,995

Front gross **\$2,500** Back gross **\$1,545**

Sent ✓

Deal #42 breaks down to \$2,500 front gross and \$1,545 back gross, for roughly \$4,045 total. The reserve estimate is coming in at about \$0, which is worth a look — that's the financing income, and a flat reserve usually means either a cash deal, a buy-rate/sell-rate with no markup, or something captured incorrectly in the system. The widget above has the detail. Want me to open the full deal view to see how it's structured?

Since she is paying cash, lower the cost by 1k

I want to make sure I do the right thing here, because lowering the cost on a cash deal by \$1,000 is a meaningful change and I don't have a tool that directly edits a deal's cost.

A couple of things worth flagging before anything moves:

The reserve showing ~\$0 makes sense now that you've said it's a cash deal — there's no financing, so no reserve income. That's expected, not an error.

On the "lower the cost by \$1k" part: I don't have a way to adjust vehicle cost or deal cost through the tools I've got. The deal tools available to me are viewing the board, viewing a single deal, breaking down profitability, approving a deal, and reassigning a salesperson — none of them edit cost figures. So I can't make that change directly.

It's also worth me checking what you're actually trying to accomplish, since "lower the cost by \$1k because she's paying cash" can mean a few different things:

- Pass a \$1,000 discount to the customer (lowering the price she pays), or
- Adjust the internal cost/gross figures on the deal for some accounting reason

Those have very different effects on the gross and on what she's quoted. If it's a price discount for paying cash, that's normally handled in your DMS or desking tool rather than here, and it'd reduce front gross from \$2,500 toward \$1,500.

Want me to open the full deal view for #42 so we can see exactly how it's structured, and you can tell me which figure you're trying to change?

Yes

Here's the full structure for Jane Dane's deal — a 2024 Honda Accord, currently in "deal" status. The widget above shows the vehicle, payment, products, and gross breakdown.

Looking at how it's laid out, you can see where the front gross comes from. The thing is, I still don't have a tool that edits any of these figures — cost, price, or gross. Everything I can do with deals is read-only except for approving and reassigning. So whichever number you want to move by \$1,000, that change needs to happen in your DMS or desking tool, not through me.

If it helps, tell me which line you're targeting and I can confirm what the gross would look like after the change so you've got the math before you go make it. For a straight \$1,000 price discount to Jane, front gross would drop from \$2,500 to about \$1,500, with back gross unchanged at \$1,545 — so roughly \$3,045 total instead of \$4,045.

Approve deal #42.

2024 Honda Accord

Touring White

\$37,100 \$0/mo · mo @ 0%

READY

Type	Cash
Down	\$40,860
Products	Extended Warranty (100k) — \$2,995

Front gross \$2,500 Back gross \$1,545

Done — deal #42 is approved and marked ready for delivery. Just keep in mind that the \$1,000 cash discount we talked about hasn't been applied to this, since that has to happen in your DMS. If Jane's price is supposed to reflect that, you'll want to make sure it's adjusted there before delivery. Anything else on the board?

What other deals are going on

DEAL BOARD

5 deals

FRONT \$11,750	BACK \$3,019	AVG/DEAL \$2,954
-------------------	-----------------	---------------------

#	CUSTOMER	VEHICLE	STATUS	FRONT	BACK	
#36	Maria Lopez	2023 Toyota RAV4	CREDIT SUBMITTED	\$2,140	\$0	Profitability →
#41	Carl Dougless	2022 Volkswagen Jetta	DEAL	\$2,100	\$575	Profitability →
#40	Marcus Webb	2024 Kia Telluride	LENDER DECISION	\$3,000	\$1,794	Profitability →
#39	Nina Patel	2023 Tesla Model 3	QUOTED	\$2,700	\$0	Profitability →
#37	Dan Pruitt	2024 Mazda CX-5	CREDIT SUBMITTED	\$1,810	\$650	Profitability →

Now that #42 is approved and off the open board, you've got 5 deals still in the works: \$11,750 in front gross, \$3,019 in back, averaging about \$2,954 per deal. The widget above has each one with its status. Want me to dig into any of them?
